

A USANA Garden Tower is a simple, powerful solution that provides nutritious food for people all over the world. Made from long-lasting, durable material, each tower measures just three feet in diameter and can hold up to **120 plants** that can be **harvested for years**.

Millions of families across the world have inadequate access to a secure source of food. At the USANA Foundation, we're always looking for innovative, sustainable solutions to tackle malnutrition and empower families to **feed, nourish, and provide** for themselves for years to come—solutions like USANA Garden Towers.

Garden Towers: *More Than Food*

Meals

A Garden Tower provides a family of six with five meals or more per week.

Income

Families often sell excess vegetables for US \$3 or more per week. Many use the money to pay their children's school fees.

Mind and Body Health

Proper nutrition leads to improved brain and body development. Garden Towers promote self-reliance and confidence.

Land Conservation

More than one billion people do not have rights to any land. Each Garden Tower takes up only three square feet.

Water Conservation

Garden Towers use 30% less water than traditional gardening practices.

Get Involved

For only US \$20, you can provide a family a Garden Tower and everything they will need to successfully produce **five to eight nutritious meals per week for years to come.**

Support a family in need. Either:

1 Enroll in a monthly donation to provide one or more Garden Towers, or;

2 Add a Garden Tower to your shopping cart on **USANA.com.**

You can also visit **USANAFoundation.org/donate** to pledge your support to this worthy cause and discover other USANA Foundation fundraising and service opportunities.
